## BIRD LIST – OWEN SOWERWINE NATURAL AREA

This cumulative list of species is based on periodic visits and surveys during all seasons by members of the Flathead Audubon Society and others to the Owen Sowerwine Natural Area, 1992-2019, including 20 Kalispell Christmas Bird Counts. This list was started in 1992 and maintained for 22 years by Dan Casey, to whom OSNA owes so much. The list includes species seen along the Stillwater River from Conrad Drive to Leisure Lane and overhead; it includes a few species (marked with an \*) seen adjacent to or over, but not within, OSNA. Evidence of breeding status is as described in Montana Bird Distribution, 7<sup>th</sup> edition: **t** = no evidence of breeding; **b** = circumstantial evidence of breeding (e.g. singing males); and **B** = definitive evidence of breeding (e.g. occupied nest, dependent young).
